WASTE MANAGEMENT – GREEN CAMPUS

The decomposable waste and food waste are accumulated in one place. The department of Agricultural Engineering used those waste for their Agri field as a fertilizer.

The few other solid waste are burnt in the boiler which is assembled in the hostel mess. Throughout the campus more than 250 trees and 1 acre lawn are in the campus.

Our Kannampalayam town Panchayat collects the other wastages in the daily bases.

The treated water from the sewage plant are used for the watering of trees and lawns. So our campus is a Green Campus.
